| Foreword/Avant-propos | iii |
| 1. INTRODUCTION | 1 |
| 1.1 Basic Assumptions | 1 |
| 1.2 Approach | 2 |
| 1.3 From Technology to Operational Capabilities | 3 |
| 1.4 Relationship to Other Studies | 3 |
| 2. THE FUTURE DEFENCE ENVIRONMENT | 5 |
| 2.1 Causes of Conflict | 5 |
| Social Disparity | 5 |
| Ethnic and Religious Rivalry | 5 |
| Religious Fundamentalism | 5 |
| Organised Crime | 5 |
| Terrorism | 6 |
| 2.2 Potential Threats | 6 |
| Civilian Services | 6 |
| Commercial Technology | 6 |
| Accessibility of Military Expertise | 7 |
| Vulnerability of Information | 7 |
| 2.3 The Nature of the Battlefield | 7 |
| Weapon Effectiveness | 7 |
| Reaction Times in the Application of Force | 8 |
| Cost Advantages - Offensive versus Defensive | 8 |
| 2.4 Keeping NATO Armed and Equipped | 8 |
| The Military Balance Sheet | 8 |
| Industrial Internationalisation | 8 |
| Changes in Defence Production | 9 |
| 3. FUTURE MILITARY NEEDS | 11 |
| 3.1 Information Exchange and Decision Making | 11 |
| 3.2 Mobility | 12 |
| 3.3 Survivability | 12 |
| 3.4 Mission Effectiveness | 13 |
| 3.5 Sustainability | 13 |
| 4. INFORMATION | 15 |
| 4.1 Command and Control | 16 |
| Information Acquisition | 16 |
| Information Integration and Fusion | 17 |
| Communications - Military Information Highway | 18 |
| Packet Switching | 18 |
| Synthetic Environments | 19 |
| Architectures | 21 |
| Vision | 24 |
| 4.2 Warfare in Information Systems | 24 |
| The Information Society | 25 |
| Vulnerabilities | 26 |
| Information Warfare Measures | 27 |
| Defence | 27 |
| 4.3 Summary | 28 |

| | |
|--|-----------|
| 5. HUMAN-MACHINE PARTNERSHIP | 31 |
| 5.1 Human-Machine Interaction | 31 |
| Human Models | 31 |
| Psychophysiological Augmented Cockpits | 32 |
| Alternative Controls | 32 |
| Performance Monitoring | 33 |
| Electronic Assistance | 34 |
| 5.2 Sustained Operations | 34 |
| Fatigue Management | 35 |
| Non-pharmaceutical Techniques | 35 |
| Pharmaceutical Techniques | 35 |
| 5.3 System Design | 36 |
| Mission Integration | 36 |
| Protection | 37 |
| 5.4 Summary | 39 |
| 6. DETECTION AND DENIAL | 41 |
| 6.1 Sensors | 41 |
| Synthetic Aperture Radar | 41 |
| Microwave Radiometry | 43 |
| Multispectral and Hyperspectral Sensors | 43 |
| Distributed Sensor Systems | 45 |
| 6.2 Anti-Stealth Technologies - Advanced Sensors | 46 |
| Ultra-Wideband Waveforms | 46 |
| 6.3 Stealth Technologies | 47 |
| Passive Methods of RCS Reduction | 47 |
| Active Measures of RCS Reduction | 47 |
| IR Signature Reduction | 48 |
| 6.4 Jamming/Anti-Jamming | 48 |
| 6.5 Stealth versus Anti-Stealth | 49 |
| 6.6 Summary | 49 |
| 7. EVOLVING SYSTEMS | 51 |
| 7.1 Directed-Energy Weapons | 51 |
| Electromagnetic Pulse and Ultra-Wide Band Pulse | 51 |
| High-Power Microwaves | 52 |
| Travelling Wave Tubes | 52 |
| Magnetrons | 52 |
| Klystrons | 52 |
| Evolution | 52 |
| Systems Considerations | 53 |
| Hostile Exploitation and Proliferation Aspects | 53 |
| RF Warheads | 53 |
| Laser-Directed Energy | 53 |
| High-Energy Laser (HEL) | 53 |
| Low-Power Laser Threats | 54 |
| Advanced Laser-Protective Technologies | 54 |
| 7.2 Future Combat Aircraft | 55 |
| Upgrades | 55 |
| A New Generation Fighter | 56 |
| Weapons | 56 |
| Critical Technologies for Future Combat Aircraft | 57 |
| Stealth with Large Volume | 57 |
| Modular/Conformal Airframe | 57 |
| Weapon Miniaturisation | 58 |
| Pilot Associates | 58 |
| Defensive Measures | 58 |
| Advanced Propulsion | 59 |
| Summary | 59 |

| | | |
|-----------|---|-----------|
| 7.3 | Future Heavy Transport | 59 |
| | Airlift | 59 |
| | Tactical Assault Transport | 59 |
| | Precision Air Drop | 60 |
| | Air Refuelling | 60 |
| | Greater Autonomy and Lower Maintenance | 60 |
| | Non-Logistics Roles | 61 |
| | Information Acquisition | 61 |
| | Directed-Energy Weapons Platform | 61 |
| | Airborne Vehicle Carrier | 61 |
| | Dual Use | 62 |
| 7.4 | Future UAVs | 62 |
| | Long Range/Long Endurance | 62 |
| | Micro Vehicles | 63 |
| | Dual Use | 63 |
| 7.5 | Summary | 64 |
| 8. | NEW SYSTEMS CONCEPTS | 65 |
| 8.1 | Unmanned Tactical Aircraft | 65 |
| | System Overview | 65 |
| | Mission Concept | 66 |
| | Expanded Options | 67 |
| | Concept of Operations | 67 |
| | Total System Concept | 69 |
| | Affordability Considerations | 69 |
| | Technology Requirements | 70 |
| | Hostile Exploitation | 70 |
| | Summary | 71 |
| 8.2 | Hypersonic Air-Breathing Missile | 71 |
| | Missions and Capabilities | 72 |
| | Transient Targets | 72 |
| | Deep/Hardened Targets | 72 |
| | High-Value Airborne Targets | 73 |
| | Quick-Reaction Reconnaissance | 73 |
| | Tactical Launch Platforms | 73 |
| | Design Consideration Issues | 73 |
| | Vehicle Configuration | 73 |
| | Propulsion | 74 |
| | Materials | 75 |
| | Thermal Management | 75 |
| | Target Detection, Guidance, and Tracking | 75 |
| | Test and Evaluation | 75 |
| | Affordability | 75 |
| | Proliferation | 76 |
| | Dual Use | 76 |
| | Summary | 76 |
| 8.3 | Space Access | 77 |
| | Orbital Vehicles | 78 |
| | Extended Air Defence, Counter-Ballistic Missile Defence | 78 |
| | Satellite Maintenance and Defence | 79 |
| | In-Orbit Infrastructure | 79 |
| | Counter Satellite | 79 |
| | Space Cleaning | 79 |
| | Sub-Orbital RSTA Platforms | 79 |
| | Affordability | 80 |
| | Proliferation | 80 |
| | Conclusions | 81 |
| 8.4 | Summary | 81 |

| | |
|--|------------|
| 9. COST | 83 |
| 9.1 Elements of Life-Cycle Cost | 83 |
| 9.2 Cost Control Techniques | 83 |
| Synthetic Environments in the Planning/Procurement Cycle | 83 |
| Optimisation | 85 |
| Virtual Manufacturing and Concurrent Engineering | 85 |
| Test by Analysis | 85 |
| 9.3 Cost Reduction | 86 |
| Smart Structures Technology | 86 |
| Basic Materials | 86 |
| Manufacturing | 87 |
| Information Systems | 87 |
| Reduction of Operating Costs | 88 |
| Maintainability Improvement | 88 |
| 9.4 The Joint Strike Fighter Example | 88 |
| 9.5 Summary | 89 |
| | |
| ANNEX 1: COMMUNICATIONS ELECTRONIC WARFARE/DEFENCE | 91 |
| Radio Line-of-Sight (LOS) Systems | 92 |
| VHF, UHF Radio Systems (& LOS HF) | 92 |
| SATCOM Electronic Warfare Considerations | 94 |
| Means of Service Denial | 95 |
| Means of Exploitation | 97 |
| Counter-Counter Measures | 97 |
| Small Terminals | 97 |
| Non-LOS Radio Systems | 98 |
| Ionospheric Reflection (HF) | 99 |
| Surface Wave | 99 |
| Meteor Burst | 100 |
| Conclusions | 100 |
| References | 102 |
| | |
| ANNEX 2: SYNTHETIC ENVIRONMENTS | 103 |
| Current Status | 103 |
| Technical Issues | 104 |
| | |
| ANNEX 3: PROPAGATION, SCATTERING, AND MODELLING | 107 |
| Potential Improvements in Environment Sensing | 107 |
| Electro-Optical Propagation | 107 |
| ElectroMagnetic Propagation | 108 |
| Surface Clutter | 109 |
| | |
| ANNEX 4: RSTA - SIGNAL PROCESSING | 111 |
| Potential Improvements in Signal and Data Processing Techniques for RSTA | 111 |
| MultiDimensional Signal Processing for Radar Applications | 111 |
| Pattern Recognition | 111 |
| Fusion | 112 |
| | |
| ANNEX 5: HYPERSONIC AIR-BREATHING MISSILE TECHNOLOGIES | 113 |
| Airframe/Engine Integration | 113 |
| Propulsion System | 113 |
| Cycle Optimisation | 114 |
| Inlet/Combustor Interaction | 114 |
| Combustion Technology | 114 |
| Two-Phase Flow | 114 |
| Engine Operability | 115 |
| Endothermic/High Heat-Sink Fuels | 115 |
| High-Temperature Lubricants and Seals | 115 |

| | |
|--|------------|
| Actively Cooled Panels/Integrated Structures | 115 |
| Nozzle Chemistry/Kinetics/Performance | 116 |
| Thermal Protection (Passive and Active) | 116 |
| Launch/Acceleration Booster | 116 |
| Thermal Management | 116 |
| Structures and Materials | 117 |
| High-Temperature Metals and Alloys | 117 |
| Carbon-Carbon and Ceramic-Matrix Composites | 118 |
| High-Temperature Sensor Aperture Materials | 118 |
| Nose Cap/Leading-Edge Materials Development | 118 |
| Manufacturing Technology for Regeneratively Cooled Structures | 118 |
| Design Criteria Development and Validation | 118 |
| Computational Analysis/Design Code Development | 119 |
| CFD Improvements | 119 |
| Turbulence Modelling (Compressible Flows) | 120 |
| Inlet-Shock/Boundary Layer Interaction/Transition/Prediction | 120 |
| Flow Diagnostics, Sensors | 121 |
| Configuration Optimisation | 121 |
| Weapons Separation | 121 |
| Weapon System Guidance and Tracking | 121 |
| Global Navigation Satellite System (GNSS)/Inertial Navigation System (INS) | 121 |
| Targeting/Tracking Control System Logic | 121 |
| Lightweight High-Energy Batteries | 122 |
| Air Vehicle/Propulsion System Thermal Management Integration | 122 |
| Mission Simulation and Testing | 122 |
| Stability and Control | 123 |
| Sensors and Sensor Windows | 123 |
| Aerodynamically Configured Vehicles - Waveriders | 124 |
| Weapon System Test and Evaluation (T&E) | 124 |
| Propulsion | 124 |
| Airframe/Engine Integration | 125 |
| Thermal Management | 125 |
| Structures and Materials | 125 |
| Stability and Control | 125 |
| Guidance and Tracking/Mission Simulation | 125 |
| ANNEX 6: REUSABLE SPACE LAUNCHERS - NATIONAL PROGRAMMES | 127 |
| US Programmes | 127 |
| US Reusable Launch Vehicle Programme | 127 |
| Hyper-X Programme | 128 |
| Hytech Programme | 128 |
| Dual-Fuel Air-Breathing Hypersonic Vehicle Study | 128 |
| Future European Space Transport Infrastructure Programme (FESTIP) | 128 |
| Russian ORYOL Future Launchers Programme | 129 |
| Japanese Activities Towards Reusable Launchers and Space Planes | 129 |
| Technology Fallouts | 130 |
| Composite Primary Structures | 130 |
| Lightweight Sub-Systems | 130 |
| Aluminium-Lithium Cryogenic Oxygen Tank and Graphite Composite Cryogenic Hydrogen Tank | 130 |
| Lightweight Reusable Thermal Protection Systems | 130 |
| Air-Breathing Hypersonic Propulsion | 130 |
| Tri-Propellant and Other Advanced High Thrust-to-Weight Ratio Rocket Engines | 131 |
| Artificial Intelligence Health Management | 131 |
| Other Spin-Offs at System Level | 131 |

| | |
|--|------------|
| ANNEX 7: PROTECTION AGAINST LASERS AFFECTING HUMAN VISION | 133 |
| Introduction | 133 |
| Laser Threat | 133 |
| Some Important Lasers | 133 |
| Effects of Laser Radiation | 133 |
| Description of Some Effects | 134 |
| Some Consequences | 135 |
| Dazzle | 135 |
| Temporary Scotoma | 135 |
| Protection and Hardening | 135 |
| Passive Protection | 136 |
| Neutral Density Filters | 136 |
| Coloured Glasses | 136 |
| Organic Dyes Absorption | 137 |
| Absorption Filters (general) | 137 |
| Interference Reflection in Multilayer Structures | 137 |
| Holographic Filters | 138 |
| Active Protection | 138 |
| Self-Activated Switches | 138 |
| Externally Activated Shutters | 139 |
| Hardening | 139 |
| References | 140 |
| Definitions | 140 |
| | |
| ANNEX 8: THE FUTURE OF AIRCRAFT GAS TURBINE ENGINES | 141 |
| Introduction | 141 |
| Aircraft Gas Turbine Engine Impact | 141 |
| Development of Gas Turbine Engine Technology Needs | 142 |
| Turbofan/Turbojet Propulsion Technology Needs | 145 |
| Turboprop/Turboshaft Propulsion Technology Needs | 149 |
| Summary | 150 |
| | |
| ANNEX 9: UNMANNED TACTICAL AIRCRAFT TECHNOLOGY REQUIREMENTS | 151 |
| Control Technologies | 151 |
| Communications Technologies | 153 |
| Sensor Technologies | 154 |
| Information Fusion Technologies | 155 |
| Data Compression Technologies | 156 |
| Airframe Technologies | 157 |
| Aircraft Control Technologies | 158 |
| Pre-Mission Operations | 160 |
| Mission Operations | 160 |
| Automated Control System Technology Developments | 160 |
| | |
| ANNEX 10: STRUCTURES AND MATERIALS FOR COST EFFECTIVENESS | 163 |
| Introduction | 163 |
| Multidisciplinary Optimum Design | 163 |
| Smart Structures Technology | 164 |
| Basic Materials | 164 |
| Manufacturing | 165 |
| Maintainability | 165 |
| | |
| ANNEX 11: FUTURE DIRECTIONS IN ROCKET PROPULSION | 167 |
| Propellants | 167 |
| Boost and Orbit Transfer Propulsion | 167 |
| Solid Space-Launch Propellants | 167 |
| Liquid Propellants | 167 |

| | |
|--|----------|
| Spacecraft Propulsion | 167 |
| Tactical Propulsion | 168 |
| Propellant Management Devices | 168 |
| Boost and Orbit Transfer | 168 |
| Spacecraft Propulsion | 169 |
| Tactical Propulsion | 169 |
| Combustion and Energy Conversion Devices | 169 |
| Boost and Orbit Transfer Propulsion | 170 |
| Spacecraft Propulsion | 171 |
| Tactical Propulsion | 171 |
| Control Systems | 171 |
| Boost and Orbit Transfer Propulsion | 172 |
| Spacecraft Propulsion | 172 |
| Tactical Propulsion | 172 |
| APPENDIX | A |
