# **Computer Based Decision Support Tool for Helicopter Mission Planning in Disaster Relief and Military Operations**

(Outil informatique d'aide à la décision pour la  
planification des missions d'hélicoptères  
dans des opérations militaires et de  
secours en cas de catastrophe)

Final Report of Task Group SAS-045.

---

# The Research and Technology Organisation (RTO) of NATO

RTO is the single focus in NATO for Defence Research and Technology activities. Its mission is to conduct and promote co-operative research and information exchange. The objective is to support the development and effective use of national defence research and technology and to meet the military needs of the Alliance, to maintain a technological lead, and to provide advice to NATO and national decision makers. The RTO performs its mission with the support of an extensive network of national experts. It also ensures effective co-ordination with other NATO bodies involved in R&T activities.

RTO reports both to the Military Committee of NATO and to the Conference of National Armament Directors. It comprises a Research and Technology Board (RTB) as the highest level of national representation and the Research and Technology Agency (RTA), a dedicated staff with its headquarters in Neuilly, near Paris, France. In order to facilitate contacts with the military users and other NATO activities, a small part of the RTA staff is located in NATO Headquarters in Brussels. The Brussels staff also co-ordinates RTO's co-operation with nations in Middle and Eastern Europe, to which RTO attaches particular importance especially as working together in the field of research is one of the more promising areas of co-operation.

The total spectrum of R&T activities is covered by the following 7 bodies:

- AVT Applied Vehicle Technology Panel
- HFM Human Factors and Medicine Panel
- IST Information Systems Technology Panel
- NMSG NATO Modelling and Simulation Group
- SAS System Analysis and Studies Panel
- SCI Systems Concepts and Integration Panel
- SET Sensors and Electronics Technology Panel

These bodies are made up of national representatives as well as generally recognised 'world class' scientists. They also provide a communication link to military users and other NATO bodies. RTO's scientific and technological work is carried out by Technical Teams, created for specific activities and with a specific duration. Such Technical Teams can organise workshops, symposia, field trials, lecture series and training courses. An important function of these Technical Teams is to ensure the continuity of the expert networks.

RTO builds upon earlier co-operation in defence research and technology as set-up under the Advisory Group for Aerospace Research and Development (AGARD) and the Defence Research Group (DRG). AGARD and the DRG share common roots in that they were both established at the initiative of Dr Theodore von Kármán, a leading aerospace scientist, who early on recognised the importance of scientific support for the Allied Armed Forces. RTO is capitalising on these common roots in order to provide the Alliance and the NATO nations with a strong scientific and technological basis that will guarantee a solid base for the future.

## **Chapter 5 – Generic Modelling Framework** **5-1**

5.1	Mathematical Models	5-1
5.1.1	Basic Formulation: MODEL C1	5-1
5.1.1.1	Requirements of Demand Locations	5-1
5.1.1.2	Supply Information of Operation Bases	5-1
5.1.1.3	Helicopter Parameters	5-1
5.1.1.4	Routing Related Parameters	5-2
5.1.1.5	Time Related Parameters	5-2
5.1.2	Outputs of the Model	5-2
5.1.2.1	Routes of Helicopters	5-2
5.1.2.2	Material – Human Load and Unload Quantities	5-2
5.1.2.3	Refueling Locations and Amounts	5-2
5.1.2.4	Bin Packing of Helicopters at Each Flight Leg	5-2
5.1.3	Assumptions of the Model	5-2
5.1.3.1	Routing Assumptions	5-2
5.1.3.2	Cargo Capacity Assumptions	5-2
5.1.3.3	Demand Assumptions	5-3
5.1.3.4	Fuel Assumptions	5-3
5.1.4	Model Formulation	5-3
5.1.4.1	Objective Function	5-8
5.1.4.2	Routing Constraints	5-8
5.1.4.3	Cargo Capacity Constraints	5-8
5.1.4.4	Material and Human Transportation Constraints	5-8
5.1.4.5	Human Evacuation Constraints	5-8
5.1.4.6	Fuel Constraints	5-9
5.1.4.7	Bin Packing Constraints	5-9
5.2	Formulation for Unlimited Helicopter Case: MODEL – NC2	5-10
5.3	Formulation Based on NARATs: MODEL – AN3	5-11
5.3.1	Input Parameters of the Model	5-11
5.3.1.1	NARATs – Requirements and Supply Locations	5-11
5.3.1.2	Helicopter Parameters	5-12
5.3.1.3	Routing Parameters	5-12
5.3.2	Outputs of the Model	5-12
5.3.2.1	Accepted NARATs	5-12
5.3.2.2	Routes of Helicopters	5-12
5.3.3	Assumptions of the Model	5-12
5.3.3.1	Routing Assumptions	5-12
5.3.3.2	NARAT Assumptions	5-12
5.3.3.3	Helicopter Transportation Capacity Assumptions	5-12
5.3.4	Model Formulation	5-12

5.3.4.1	Objective Function	5-14
5.3.4.2	Routing Constraints	5-14
5.3.4.3	NARAT Assignment Constraints	5-15
5.3.4.4	Helicopter Capacity Related Constraints	5-15
5.4	An Alternative Formulation Based on NARATs: MODEL – AN4	5-15
5.4.1	Input Parameters of the Model	5-15
5.4.1.1	NARATs – Requirements and Supply Locations	5-15
5.4.1.2	Routing Related Parameters	5-16
5.4.1.3	Helicopter Parameters	5-16
5.4.2	Outputs of the Model	5-16
5.4.2.1	Number of Assigned Helicopters	5-16
5.4.2.2	Number of Sorties	5-16
5.4.3	Model Formulation	5-16
5.4.3.1	Objective Function	5-18
5.4.3.2	NARAT Requirement Constraints	5-18
5.4.3.3	Helicopter Assignment Constraints	5-19
5.4.3.4	Dimensionality of the Model	5-19
5.5	Solution Procedures	5-19
5.5.1	Input Parameters of the Model	5-19
5.5.1.1	Notation	5-20
5.5.1.2	The Algorithm	5-20
5.5.1.3	Helicopter Selection Methods	5-23
5.5.1.4	Demand Node Selection Methods	5-24
5.5.1.5	Feasibility Checks	5-24
5.5.1.6	Fuel Feasibility Checks	5-24
5.5.1.7	Helicopter Capacity Checks	5-24
5.5.1.8	Supply Feasibility Checks	5-24
5.5.2	Hybrid Algorithm	5-24
5.5.3	Helicopter Aggregation Algorithm	5-27
5.6	User Interfaces of the Decision Support Tool	5-29

<b>Chapter 6 – Scenario Analysis</b>	<b>6-1</b>
6.1 Disaster Relief and Humanitarian Aid Environment	6-1
6.1.1 Inputs of the Model	6-2
6.1.2 Scenario Solution for MODEL – C1	6-3
6.2 Military Environment	6-7
<b>Appendix 6.1 – NARATs</b>	<b>6-19</b>

<b>Chapter 7 – Conclusion</b>	<b>7-1</b>
-------------------------------	------------

<b>Chapter 8 – References</b>	<b>8-1</b>

## Acknowledgements

This report is prepared to fulfil the requirements of the Programme of Work of NATO SAS-045 RTG which has been supported by France, Germany, Poland, the Netherlands and Turkey on “Computer Based Decision Support Tool for Helicopter Mission Planning in Disaster Relief and Military Operations”. We would like to express our deepest gratitude to those in NATO RTA and RTB, who have unanimously contributed to this study.

<b>14. Abstract</b>	<p>The SAS-045 study group was formed to propose a framework for a generic and flexible decision support tool that can be used in effective management of helicopter missions both during humanitarian and military operations. This report provides an in-depth discussion of the research process executed by the team and the output of each of those modules. A problem analysis module provides the operational context, mission types, and the decision-making framework. A concept of solutions module presents the mathematical modeling description, the resolution method, and computational results on testing scenarios. Finally, the technical requirements module describes the information management system, database interfacing module, and the protocols and, as well, the information support tool dependencies are defined.</p>

Les publications de l'AGARD et de la RTO peuvent parfois être obtenues auprès des centres nationaux de distribution indiqués ci-dessous. Si vous souhaitez recevoir toutes les publications de la RTO, ou simplement celles qui concernent certains Panels, vous pouvez demander d'être inclus soit à titre personnel, soit au nom de votre organisation, sur la liste d'envoi.

Les publications de la RTO et de l'AGARD sont également en vente auprès des agences de vente indiquées ci-dessous.

Les demandes de documents RTO ou AGARD doivent comporter la dénomination « RTO » ou « AGARD » selon le cas, suivi du numéro de série. Des informations analogues, telles que le titre est la date de publication sont souhaitables.

Si vous souhaitez recevoir une notification électronique de la disponibilité des rapports de la RTO au fur et à mesure de leur publication, vous pouvez consulter notre site Web ([www.rto.nato.int](http://www.rto.nato.int)) et vous abonner à ce service.

## DISTRIBUTION OF UNCLASSIFIED RTO PUBLICATIONS

AGARD & RTO publications are sometimes available from the National Distribution Centres listed below. If you wish to receive all RTO reports, or just those relating to one or more specific RTO Panels, they may be willing to include you (or your Organisation) in their distribution.

RTO and AGARD reports may also be purchased from the Sales Agencies listed below.

Requests for RTO or AGARD documents should include the word 'RTO' or 'AGARD', as appropriate, followed by the serial number. Collateral information such as title and publication date is desirable.

If you wish to receive electronic notification of RTO reports as they are published, please visit our website ([www.rto.nato.int](http://www.rto.nato.int)) from where you can register for this service.
